

ABSTRACT

Ariano, NR. et al., **Assessing Green Tourism Practices of Quezon National Agricultural School (QNAS) in Malicboy, Pagbilao, Quezon.** Research and Development. Quezon National Agricultural School. August, 2020.

This research aims to find if Quezon National Agricultural School (QNAS) follows the principles governing green tourism. The objectives of the study are: (a) to identify the different principles that must be practiced for green tourism; (b) to determine if QNAS is following the principles governing green tourism; and (c) to determine how far/ close is QNAS in achieving green tourism.

This study focused on the determination on how close QNAS is in achieving its goal of becoming a green tourism institution. The researchers aimed to determine if Quezon National Agricultural School (QNAS) follow the principles governing green tourism. The study was conducted on Quezon National Agricultural School, Brgy. Silangang Malicboy, Pagbilao, Quezon. This study used questionnaires in a form of survey and was answered by the students under the UAQTEA Scholarship Program, and the faculty and staff of the institution.

In this paper, green tourism, which is a kind of low Impact to environment but contributing or protecting to the environment and culture inherently. As we can see from the criteria or principles for green tourism, it has a wide range of conditions and standards, but which also means there are many possibilities and potential development for green tourism worldwide. Thus, the institution will continue to follow these principles to become a greener QNAS.
